WU PRO SERIES 2.5MM | 300' X 5.6'

WASHINGTON, D.C. - The Kennedy Center, renowned as the nation's busiest performing arts center, now features a dynamic 3-sided direct view LED video wall from Taylorleds, utilizing the WU Series 2.5mm panel. The expansive video wall measures a total of 300 feet in width and 5.6 feet in height, encapsulating the vibrancy and grandeur of the venue.

The physical installation was completed in less than five days. Each of the four corners had to meet perfectly within less than 2mm to provide a seamless installation and visual effect. The LED walls encompass over 36,000 pixels wide using 750 of our exceptional WU panels and are processed using six NovaStar Technology MCTRL4K processors.
